
(a) Original neighbourhood
Zero-effect set $\mathcal{Z}_0$
Affected
B_0
r_0
v_0
$\partial\mathcal{Z}_0$
(b) Radius increased by s
Zero-effect set $\mathcal{Z}_0$
Affected
B_s
B_0
v_0
Width $\propto \sqrt{s}$
Depth s
$\partial\mathcal{Z}_0$
Added zero-effect area (panel b)
Affected cap
Distance from $\mathcal{Z}_0$ at least $s/2$
